ABOUT US :

Hind Polymer Is One Of The Fastest-growing Plastic Lumps And Granules Manufacturers And Suppliers In Junagadh, Gujarat. In 1980, It Was Established As A Small Trader By The Late Mr. Siddique Patni. It Comes From Our Third Generation. And Now It Is Known As A Hind Polymer In 2015 Founded By Mr. Kasim Patni & Mr. Zaid Patni. We Have Experience Of 43 Years Which Means We Really Have More Experience In This Subject.

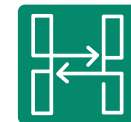

OUR PRODUCTS

Hind Polymer Is Your Partner In Polymer Innovation, Offering A Diverse Range Of High-quality Polymer Materials Designed To Meet The Demands Of Various Industries. We Use The Best Quality Scrap Materials And Our Quality Control Team Measures Throughout The Manufacturing Process To Ensure Consistent Quality In Every Batch.hind Polymer Is Committed To Reducing Our Environmental Pollution. Our Biodegradable Polymers And Sustainable Practices Reflect This Commitment.

PP GRANUALS

LD LUMPS

HDPE PP LUMP (RAFFIA)

PP GRANUALS

Hind Polymers is known as the famous manufacturer and supplier of high-grade PP granules in Gujarat. these small granules form polypropylene known for its creativity and flexibility. Our expert team manufactures PP Granules with the use of the latest technology and supplies them for the creation of new products. The low density of our PP Granules product contributes to lightweight products. Hind Polymers continues to manufacture high-quality PP Granules to play a vital role in shaping a greener and more efficient future.

LD LUMPS

Hind Polymer is the best manufacturer and supplier of LD Lumps in Gujarat. These solid form of LD Lumps has characteristics of creativity, strength, and durability, found in diverse industries and applications. Our product LD Lumps is known for its unique molecule structure. LD Lumps have a lower density and greater flexibility compared to other forms of lumps. LD Lumps are an ideal choice for chemical containers and packaging. It has a transparent nature making it suitable for applications requiring transparency. It has an eco-friendly nature by reducing the need for new plastic products.

HDPE PP LUMP (RAFFIA)

Hind Polymer is a leading supplier and manufacturer of Rafiya-grade HD PP Lumps. It is not just one of the lumps- It's used in lots of fields. HD PP is known for its durability and strength. it creates strong intermolecular force and high tensile strength. It is also harder and more opaque. HD PP can be molded into a variety of forms, including sheets, pipes, and more. Our innovative team has the talent to manufacture high-quality HD PP lumps that have long-lasting strength, are easily molded into new products, and are lightweight and easily transported. Our products are not only versatile but also popular.

WE ARE ALSO DEALING IN :

HD Ropes ,

4 mm to 32 mm

PP Danline Ropes

6 mm to 32 mm

Baler Twin

5000 to 90000 Denier

Pet Flakes

0 ppm to 200ppm
hot water wash

Box Straps

Width

Semi auto machine Size 9 mm to 19 mm
Fully auto machine Size 5 mm to 15 mm

Thickness

Semi auto machine Size 0.8 to 1 mm
Fully auto machine 0.5mm to 0.7 mm

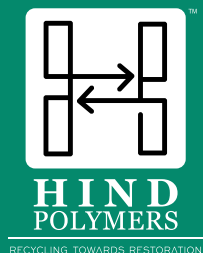

Plastic Twin

50 Grams to 1 Kg Reel Cone

Width

2.5 inch 50 gms, 4 inch
500 gms to 8 inch 1kg

**(ALL THINGS ARE
CUSTOMISED AS PER ORDER)**

WHY US ?

TIMELY DELIVERY

At Hind Polymer, We Understand The Importance Of Timely Delivery And Strive To Exceed Our Customers' Expectations. With Our State-of-the-art Manufacturing Facilities And Efficient Supply Chain Management, We Ensure That Our Products Are Delivered To Our Clients On Time, Every Time.

NEW DEVELOPMENT

Hind Polymer Is At The Forefront Of Innovation, Technology, And New Development. We Are Constantly Striving To Develop Groundbreaking Solutions. Our Team Of Skilled Researchers Works Tirelessly To Explore New Frontiers In Polymer Technology And Advanced Manufacturing Techniques.

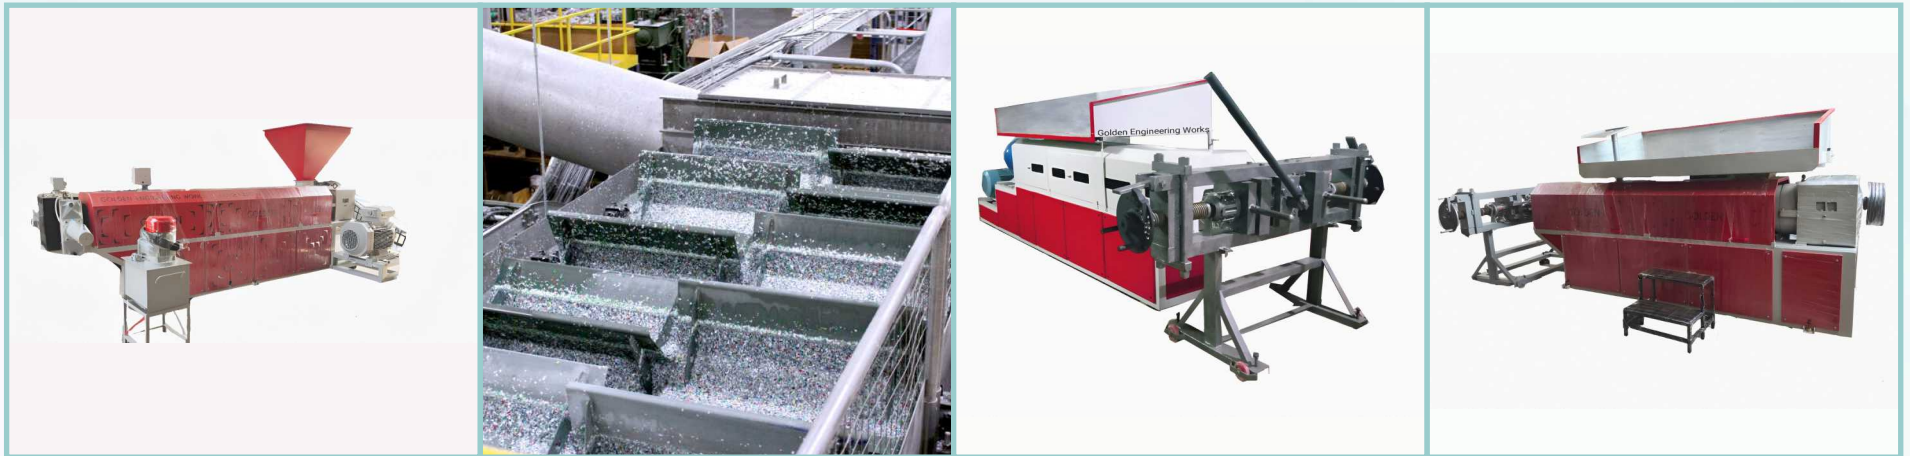

QUALITY & CONSISTENCY

Hind Polymer Takes Immense Pride In Offering A Diverse Range Of High-quality Polymer Materials Meticulously Crafted To Exceed The Expectations Of Numerous Industries. Our Unwavering Constancy To Excellence And Attention To Detail Are Evident In Every Step Of Our Manufacturing Process.

INFRASTRUCTURE:

Hind Polymer's remarkable journey starting since its establishment in 1980 as a small trader, exemplifies a commitment to excellence, innovation, and sustainable growth. In 1998, it was established as a Kismat waste supplier. Over the years, Kismat Polymer has amassed unparalleled expertise in polymer industries. then in 2007, it was established as Ekta Polymer and in 2009 as Paragati Plastic. In 2015, it became Hind Polymers, the leading manufacturer and supplier of recycling lumps and granules in Gujarat. Our rich history is built on a foundation of excellence in sorting, grinding, washing and cleaning, drying and filtering.

COMPLIANCE WITH REGULATIONS:

These steps from manufacture to delivery are followed under the guidelines set by governmental bodies like GPCB (Gujarat Pollution Control Board) and CPCB (Central Pollution Control Board). Our commitment to adhering to environmental standards and regulations. stringent environmental regulations set by GPCB and CPCB, our plastic manufacturing process embodies responsible practices. Upon cleaning dirty components with cold water, we employ meticulous filtration using fine fabric to extract contaminants, dust, and plastic fragments, rendering the water pristine. This cleansed water undergoes multiple cycles of reuse, ensuring a minimum of 10 to 12 rounds within our manufacturing operations. After its industrial uses, the water finds its purpose in agricultural applications. Additionally, we meticulously dry and store residual wet plastic scraps. Our steps toward responsible plastic production that meets both industry and environmental standards.

					
WASHING CLEANING	GRINDING	FILTERED	SORTING	WATER FILTRATION	WATER REUSE
					
MULTIPLE REUSE	END-OF-LIFE USE	DRYING & STORAGE			

MAKING A DIFFERENCE TO THE WORLD WE LIVE IN!

Reduce the amount of the earth's resources that we use. Reuse don't just bin it, someone else can make use of it. Recycle plastic materials to be made into something new. Recycling gives new life to the things we use. Recycling means taking a product or material at the end of its useful life and turning it into a usable raw material to make another product.
